Argument Against Issue 3

Vote **NO** on Issue 3 - A Blatant Political Attack on Your Right to Vote

Unneeded and Unpopular

Issue 3 seeks to scare Ohioans into not trusting our election system to boost weak political candidates. Photo Identification is already the law and this amendment locks in voter burden with no voter protections. Groups from across the political spectrum from gun rights groups, labor unions, and Ohioans across the state opposed Issue 3 for failing to provide any concrete benefit.

Vote No because Issue 3 tries to address an issue that does not exist. Voter impersonation is essentially nonexistent! Ohio's elections are safe and secure.

Fails to Protect Your Right to Vote

Issue 3 fails to provide any safety measures for our elections while leaving many of our voting rights, such as the right to vote early and the right to free voter IDs, open to attacks by extremists.

Issue 3 leaves any form of voting other than in-person open to being revoked or restricted in the future.

Vote No because Issue 3 provides no protection for your ability to vote absentee, including for servicemembers overseas, students, working parents, and seniors.

Bans Innovation

Constitutional amendments remove flexibility exactly where flexibility is needed. Issue 3 blocks county issued veterans IDs and digital military IDs currently in use.

Today in Ohio you can use your digital wallet to fly but not to vote. This amendment locks out future technology that will be both more secure and more available.

Vote No because Issue 3 is nothing more than a partisan power grab by out-of-state elites who want to rig Ohio's elections.

Vote **NO** on Issue 3

Vote "No" argument prepared by Senator Bill DeMora and Representatives Desiree Tims and Terrence Upchurch.
