# ARGUMENT IN FAVOR OF MEASURE: Q

**City of Richmond: Argument in Favor of Measure Q**

Richmond's emergency response infrastructure is failing us—and our first responders.

When a heart attack, stroke, serious injury, or other emergency strikes, **every second counts**. But our aging, undersized stations can't accommodate enough firefighters or the latest equipment needed to respond quickly. Slower response times put residents at risk when speed is a matter of life or death.

Today, some Richmond firefighters work in seismically unsafe buildings, with cracking foundations, leaky roofs, mold, and outdated electrical systems, jeopardizing their health and safety while they work to protect ours.

Measure Q is a responsible, accountable plan to fix Richmond's emergency response infrastructure. It authorizes $120 million in bonds to modernize and rehabilitate unsafe, deteriorating firefighter facilities, which will help improve emergency response times and protect the health and safety of our firefighters.

Key investments will include:

- **Improving** facilities and infrastructure to support rapid 911 emergency medical response, matching the standard of care available across the County.
- **Bringing** firefighter apparatus, equipment, and facilities up to current safety and industry standards.
- **Rehabilitating** unsafe firefighter housing, including removing mold and asbestos.
- **Replacing** deteriorating electrical systems, leaky pipes, roofs, and other aging infrastructure in fire stations.
- **Bringing** aging fire stations, some more than 80 years old, up to current building and safety codes.
- **Improving** the resiliency of fire stations and emergency response facilities during earthquakes, wildfires, and other disasters.

Measure Q requires strict accountability: independent financial audits and mandatory citizen oversight ensure every dollar is spent only on approved projects.

Richmond families deserve fast emergency response times and firefighters who are safe, equipped, and ready when they are needed most. Vote YES on Measure Q to protect our neighbors, our first responders, and our community's future.

Join Richmond firefighters, emergency medical responders, and neighbors across every district. Vote YES on Measure Q.
