Argument in Favor of Measure O

Vote Yes on O to support quality education in the Eastern Sierra Unified School District.

In our region, many high-skilled jobs go unfilled each year. Measure O will fund modern Career Technical Education (CTE) classrooms and facilities at our high schools, equipping students with the skills needed for high-demand careers and preparing them to fill jobs at local businesses.

Measure O will fund projects to support current and future education programs that ensure all students receive the college preparation and career training they need to compete for good-paying jobs.

Voting YES on O will also upgrade school safety and emergency communication systems at all ESUSD schools, addressing a growing need to keep our students safe.

Vote Yes on O to:

- Construct and equip classrooms and career technology facilities at both Coleville High School and Lee Vining High School
- Provide facilities for job skills and career readiness in agricultural science, automotive technology, and skilled trades like welding, carpentry, and mechanics
- Improve school safety and security, including doors, locks, and communication systems at all ESUSD school sites

Measure O is fiscally accountable with built-in taxpayer safeguards:

- Independent citizens' oversight and annual audits
- Detailed project list showing how Measure O funds will be used
- All Measure O funds stay local to support local schools – no funds can be taken away by the State, the County, or used for other purposes
- Funds cannot be spent on administrator or teacher salaries, benefits, or pensions

Good schools benefit us all. They improve property values, provide a better learning environment for students, increase safety, and educate tomorrow's community leaders and service providers. Even if you do not have school-age children, supporting Measure O is a wise investment.

Local Need + Local Investment = Local Benefit

Vote YES on O to invest in local schools and bright futures for Eastern Sierra students.

The undersigned Proponent(s) or Author(s) hereby state that such argument is true and correct to the best of their knowledge and belief.
