To construct and equip classrooms and career technical education (CTE) facilities at Coleville High School and Lee Vining High School for job skills/career readiness in engineering, science, automotive technology, welding, carpentry, agricultural mechanics and other skilled trades; and improve school safety/security systems, shall the measure be adopted for School Facilities Improvement District No. 1 of the Eastern Sierra Unified School District authorizing $6,000,000 in bonds at legal rates, levying approximately $19 per $100,000 assessed value ($390,000 annually) while bonds are outstanding, with citizen oversight, audits, and all money staying local?

FULL TEXT OF BOND MEASURE

KEY FINDINGS

The Eastern Sierra Unified School District (the "District") is committed to maintaining a strong, high-quality education program for students in all of its local public schools by providing safe, secure schools equipped to support current and future educational needs.

The Board of Trustees of the District (the "Board") determined that the District's schools located within School Facilities Improvement District No. 1 of the Eastern Sierra Unified School District (the "Improvement District") require updated and new career technical education facilities to meet the educational needs of its students. Coleville High School and Lee Vining High School need career technical education (CTE) classrooms and facilities to better prepare students for in-demand careers in engineering, agricultural science, automotive technology, and skilled trades such as welding, carpentry, and mechanics.

In our region, many high-skilled jobs go unfilled each year. By providing CTE classrooms, labs, and equipment that meet current industry standards, local high school students can be trained for these necessary high-skilled local jobs and be better prepared to work in local businesses in our communities. Over the past year, the District created a facilities plan for CTE classrooms and facilities at Lee Vining High School and Coleville High School. Construction costs for these facilities are beyond the scope of the District's annual budget. Passage of a school improvement bond measure could help the District qualify for state matching funds that it would otherwise not be eligible for.

Additionally, our ESUSD schools would benefit from upgrades to school safety and security systems, including security cameras, emergency communications systems, and intruder protection systems to protect our students and staff in case of an emergency.

The Board voted to place this measure on the ballot because it believes a school improvement bond measure is needed to provide locally controlled funding to repair and improve local schools.

Funds from this measure cannot be taken away by the State and must stay here in our communities to upgrade local schools. This measure requires strict accountability requirements, including an independent citizens' oversight committee, mandatory annual audits, and a prohibition against any funds being used for salaries, pensions, or benefits. Good neighborhood schools protect the quality of life and property values in our community.

BOND AUTHORIZATION

By approval of this measure by at least 55% of the registered voters voting on the measure, the District will be authorized to issue and sell bonds of up to $6,000,000 in aggregate principal amount, at interest rates not to exceed legal limits and to provide financing for the specific types of school facilities projects listed in the Bond Project List included below, subject to all the accountability requirements specified below.

ACCOUNTABILITY REQUIREMENTS

The provisions in this section are specifically included in this measure in order that the voters and taxpayers in the Improvement District may be assured that their money will be spent wisely. Expenditures to address specific facilities needs in the Improvement District will be in compliance with the requirements of Article XIIIA, Section 1(b)(3), of the State Constitution and the Strict Accountability in Local School Construction Bonds Act of 2000 (codified at Education Code Sections 15264 and following).

Bonds authorized by this measure may be issued under the provisions of the California Education Code (starting at Section 15100), under the provisions of the California Government Code (starting at Section 53506), or under any other provision of law authorizing the issuance of general obligation bonds by school districts. The bonds may be issued in series by the District, from time to time, and each series of bonds shall mature within the legal limitations set forth in the applicable law under which the bonds are issued.

Evaluation of Needs. The Board has identified detailed facilities needs in the Improvement District, and has determined which projects to finance from a local bond. The Board hereby certifies that it has evaluated safety, class size reduction, enrollment growth, and information technology needs in developing the Bond Project List described below.

Independent Citizens' Oversight Committee. Following approval of this measure, the Board will establish an independent citizens' oversight committee, under Education Code Sections 15278 and following, to ensure bond proceeds are expended only on the types of school facilities projects listed below. The committee will be established within 60 days of the date when the results of the election appear in the minutes of the Board.

Performance Audits. The Board will conduct annual, independent performance audits to ensure that the bond proceeds have been expended only on the school facilities projects listed below.

Financial Audits. The Board will conduct annual independent financial audits of the bond proceeds until all of those proceeds have been spent for the school facilities projects listed below.

Government Code Accountability Requirements. As required by Section 53410 of the Government Code, (1) the specific purpose of the bonds is set forth in this Full Text of the Measure, (2) the proceeds from the sale of the bonds will be used only for the purposes specified in this measure, and not for any other purpose, (3) the proceeds of the bonds, when and if issued, will be deposited into a building fund to be held by the Mono County Treasurer, as required by the Education Code, and (4) the Superintendent of the District shall cause an annual report to be filed with the Board not later than January 1 of each year, which report shall contain pertinent information regarding the amount of funds collected and expended, as well as the status of the projects listed in this measure, as required by Sections 53410 and 53411 of the Government Code.

Bonding Capacity. Issuance of each series of bonds authorized by this measure is required to conform with all applicable legal requirements. This includes issuance within applicable bonding capacity limitations, which may include a waiver of bonding capacity granted by the State Board of Trustees, if sought and granted.

NO TEACHER OR ADMINISTRATOR SALARIES

Proceeds from the sale of bonds authorized by this measure shall be used only for the purposes specified in Article XIIIA, Section 1(b)(3), specifically the construction, reconstruction, rehabilitation, or replacement of school facilities, including the furnishing and equipping of school facilities, and the acquisition or lease of school facilities, and not for any other purpose, including teacher and administrator salaries and other school operating expenses.

STATE MATCHING FUNDS

The following statement is included in this measure pursuant to Education Code Section 15122.5: Approval of this measure does not guarantee that the proposed projects that are the subject of bonds under this measure will be funded beyond the local revenues generated by this measure. The District's proposal for the projects described below may assume the receipt of matching state funds, which, if available, could be subject to appropriation by the Legislature or approval of a statewide bond measure.

INFORMATION ABOUT ESTIMATES AND PROJECTIONS

Voters are informed that any estimates or projections in the bond measure or ballot materials, including relating to estimated tax rates, the duration of issued bonds, and related tax levies and collections, are provided as informational only. Such amounts are estimates and are not maximum amounts or limitations on the terms of the bonds, the tax rate, or duration of the tax supporting repayment of issued bonds. Such estimates depend on numerous variables which are subject to variation and change over the term of the District's overall facilities and bond financing plan, including but not limited to the amount of bonds issued and outstanding at any one time, the interest rates applicable to issued bonds, market conditions at the time of sale of the bonds, when bonds mature, timing of project needs and changes in assessed valuations in the Improvement District. As such, while such estimates and approximations are provided based on information currently available to the District and its current expectations, such estimates and approximations are not limitations and are not binding upon the District. In addition, the abbreviated and condensed statement of the bond measure presented to voters, which is subject to a word count limitation imposed by State law, does not limit the scope and complete meaning of the measure provided in this Full Text of Bond Measure and related ballot materials.

BOND PROJECT LIST

Scope of Projects. Bond proceeds will be expended on the modernization, renovation, expansion, acquisition, construction/reconstruction, rehabilitation, and/or replacement of school facilities in the Improvement District, including the furnishing and equipping of school facilities, at all existing and future District sites within the Improvement District, primarily to construct and improve career technical education facilities, as further set forth below.

School Facility Project List. The items presented in the following list provide the types of school facilities projects authorized to be financed with voter-approved bond proceeds. Specific examples included on this list are not intended to limit the types of projects described and authorized by this measure. The following types of projects are authorized by this measure:

- Construct and improve classrooms and career technical facilities to prepare students for careers in skilled trades, including, but not limited to, welding, carpentry, automotive technology and engineering, agricultural science, and mechanics at Lee Vining High School and Coleville High School
- Improve school safety and security, including doors and locks, and communication systems
- Improve and repair school facilities, including addressing unforeseen circumstances
- Provide access to state matching funds to maximize the community's investment in local schools

Incidental Expenses. Each of the bond projects described in this Bond Project List includes the costs of furnishing and equipping such facilities, and all costs that are incidental but directly related to the types of projects described above. Examples of incidental costs include, but are not limited to: costs of design, engineering, architect and other professional services, facilities assessments, inspections, site preparation, utilities, landscaping, interior and exterior painting, bond project construction management, administration and other planning and permitting, legal, accounting and similar costs; independent annual financial and performance audits; a customary construction contingency; abatement, demolition and disposal of existing structures; the costs of interim housing and storage during construction including relocation and construction costs incurred relating to interim facilities; the preparation or restoration of construction, renovation or remodeling; rental or construction of storage facilities and other space on an interim basis for materials and other equipment and furnishings displaced during construction; costs of relocating facilities and equipment as needed in connection with the projects; the acquisition or improvement of interim classrooms and facilities for students, administrators, and school functions, including portable classrooms and other modular facilities; federal and state-mandated safety upgrades; addressing unforeseen conditions revealed by construction/modernization and other necessary improvements required to comply with existing building codes, including the Field Act; access requirements of the Americans with Disabilities Act; costs of the election; bond issuance costs; and project administration during the duration of such projects, as permitted by law.

Furnishing and Equipping. Each project is assumed to include its share of furniture, fixtures, and equipment, architectural, engineering, and similar planning costs, program/project management, staff training expenses, and a customary contingency for unforeseen design and construction costs. In addition to the listed projects stated above, the list also includes the acquisition of a variety of instructional, maintenance and operational equipment, including the reduction or retirement of outstanding lease obligations and interim funding incurred to advance fund projects from the list; installation of signage and fencing; payment of the costs of preparation of all facility planning, facility studies, assessment reviews, facility master plan preparation and updates, environmental studies (including environmental investigation, remediation and monitoring), design and construction documentation, and temporary housing of dislocated school activities caused by construction projects. The upgrading of technology infrastructure includes, but is not limited to, computers, projectors, portable interface devices, servers, switches, routers, modules, sound projection systems, printers, digital white boards, document projectors, telephone systems, network security/firewall, wireless technology systems, and other miscellaneous equipment.

Alterations to Scope; Acquisition of Real Property. The scope and nature of any of the specific projects described above may be altered by the District as required by conditions that may arise during the course of design and construction. In the event that a modernization or renovation project is more economical for or otherwise determined by the Board to be in the best interests of the District to be undertaken as new construction, this bond measure authorizes said new

construction including land acquisition, relocation and construction at a new or alternative site, and/or demolition and reconstruction and/or repurposing on the original site, including an expanded site, and all costs relating thereto. For any project involving rehabilitation or renovation of a building or the major portion of a building, the District shall be authorized to proceed with new construction instead, if the Board determines that replacement and new construction are more economically practical than rehabilitation and renovation, considering the building's age, condition, expected remaining life, and other relevant factors.

In addition, this measure authorizes the acquisition of real property, including necessary rights of ways or other real property interests, required to expand District facilities, to provide access to school or other District facilities, or to provide additional school or related facilities.

Interim Financing Included; Joint Use Projects Authorized. Authorized projects include paying and/or prepaying interim or previously obtained financing for the types of projects included on the Bond Project List, such as bond anticipation notes, and include prepayment of lease payments to acquire title to facilities and/or equipment previously financed. Projects may also be undertaken on a joint-use basis with other public entities.

Interpretation. The terms of this bond measure and the words used in the Bond Project List shall be interpreted broadly to effect the purpose of providing broad and clear authority for the officers and employees of the District to provide for the school facilities projects the District proposes to finance with the proceeds of the sale of bonds authorized by this proposition within the authority provided by law, including Article XIIIA, Section 1(b)(3) of the California Constitution, Education Code Section 15000 *et seq*. and the Strict Accountability in Local School Construction Bonds Act of 2000. Words used in the Bond Project List, such as repair, improve, upgrade, expand, modernize, renovate, and reconfigure, are used to describe school facilities projects in plain English but are not intended to expand the nature of such projects beyond what is authorized by law. As such, in accordance with legal requirements, the Bond Project List does not authorize, and shall not be interpreted to authorize, expending proceeds of the sale of bonds authorized by this proposition for current maintenance, operation, or repairs.

Severability. The Board hereby declares, and the voters by approving this Bond Measure concur, that every section and part of this bond proposition has independent value, and the Board and the voters would have adopted each provision hereof regardless of every other provision hereof. Upon approval of this measure by the voters, should any part be found by a court of competent jurisdiction to be invalid for any reason, all remaining parts hereof shall remain in full force and effect to the fullest extent allowed by law, and to this end, the provisions of this bond measure are severable.

Impartial Analysis of Measure O

This analysis was prepared by the Mono County Counsel.

Measure O would authorize the Eastern Sierra Unified School District ("the District") to issue and sell general obligation bonds within School Facilities Improvement District No. 1 of the District, which encompasses Coleville High School and Lee Vining High School. This measure was placed on the ballot by the Board of Trustees of the Eastern Sierra Unified School District, as required by Elections Code section 9051.

The Proposed Bonds

If approved, the District would be authorized to issue and sell bonds in a maximum aggregate principal amount of $6,000,000. Bond proceeds would be used to construct and equip career technical education classrooms and facilities preparing students for careers in engineering, agricultural science, automotive technology, welding, carpentry, and other skilled trades at Coleville High School and Lee Vining High School, and to improve school safety and security systems, including cameras, communication systems, and intruder-protection measures. Bond proceeds cannot be used for teacher or administrator salaries, pensions, benefits, or other district operating expenses.

Passage of Measure O requires approval by at least 55% of the voters voting on the measure, consistent with Article XIIIA of the California Constitution and the Strict Accountability in Local School Construction Bonds Act of 2000. A "YES" vote on this measure is a vote to authorize the bonds. A "NO" vote is a vote against authorizing the bonds.

Financial Effect

According to the Tax Rate Statement prepared for this election, the best estimate of the average and highest annual tax rate required to repay the bonds is $19 per $100,000 of assessed valuation, which is projected to apply in each year that bonds remain outstanding. It is currently estimated that the tax will be collected through fiscal year 2054-55. The best estimate of total debt service, including principal and interest, if all bonds are issued and sold, is approximately $11,300,000. These are estimates only; actual tax rates, debt service, and the duration of the tax may vary depending on the timing and amount of bond sales, interest rates, and changes in assessed valuation within the Improvement District.

Approval of the measure does not guarantee that all listed projects will be funded. Some projects may depend in part on state matching funds, which, if available, would be subject to future appropriation by the Legislature or voter approval of a statewide bond measure.

Accountability and Oversight

The measure requires the Board of Trustees to establish an independent Citizens' Oversight Committee, within 60 days after the election results are entered in the Board's minutes, to ensure bond proceeds are spent only on the projects listed in the measure. The District must also conduct annual independent performance and financial audits, deposit bond proceeds into a building fund held by the Mono County Treasurer, and file an annual report on the amount of funds collected and expended and the status of funded projects. Bond proceeds cannot be used for teacher or administrator salaries or other school operating expenses.

This analysis is a summary. For the full text of the measure, including the complete list of authorized projects, please see "Measure O" printed in this pamphlet.

TAX RATE STATEMENT

An election will be held in School Facilities Improvement District No. 1 of the Eastern Sierra Unified School District (the "Improvement District") on November 3, 2026, to authorize the sale of up to $6,000,000 in general obligation bonds. The following information is submitted in compliance with Sections 9400-9404 of the Elections Code of the State of California. Such information is based upon the best estimates and projections presently available from official sources, upon experience within the Improvement District, and other demonstrable factors.

Based upon the foregoing and projections of the Improvement District's assessed valuation, the following information is provided:

1. The best estimate of the average annual tax rate that would be required to fund this bond issue over the entire duration of the bond debt service, based on estimated assessed valuations available at the time of filing of this statement, is $19 per $100,000 of assessed valuation. It is currently expected that the tax will be collected until fiscal year 2054-2055.

2. The best estimate of the highest tax rate that would be required to fund this bond issue, based on estimated assessed valuations available at the time of filing this statement, is $19 per $100,000 of assessed valuation. This rate is projected to apply in each year that bonds are outstanding.

3. The best estimate of total debt service, including principal and interest, that would be required to be repaid if all the bonds are issued and sold will be approximately $11,300,000.

These estimates are based on projections derived from information obtained from official sources, and are based on the assessed value (not market value) of taxable property on the County's official tax rolls. In addition, taxpayers eligible for a property tax exemption, such as the homeowner's exemption, will be taxed at a lower effective tax rate than described above. Property owners should consult their own property tax bills and tax advisors to determine their property's assessed value and any applicable tax exemptions. The attention of all voters is directed to the fact that the foregoing information is based upon projections and estimates only, which amounts are not maximum amounts and durations and are not binding upon the District. The actual debt service, tax rates, and the years in which they will apply may vary depending on the timing of bond sales, the par amount of bonds sold at each sale, and actual increases in assessed valuations. The timing of the bond sales and the amount of bonds sold at any given time will be determined by the District based on the need for project funds and other considerations. Actual assessed valuations will depend upon the amount and value of taxable property within the Improvement District as determined by the County Assessor in the annual assessment and the equalization process.

Heidi Torix

Eastern Sierra Unified School District

Argument in Favor of Measure O

Vote Yes on O to support quality education in the Eastern Sierra Unified School District.

In our region, many high-skilled jobs go unfilled each year. Measure O will fund modern Career Technical Education (CTE) classrooms and facilities at our high schools, equipping students with the skills needed for high-demand careers and preparing them to fill jobs at local businesses.

Measure O will fund projects to support current and future education programs that ensure all students receive the college preparation and career training they need to compete for good-paying jobs.

Voting YES on O will also upgrade school safety and emergency communication systems at all ESUSD schools, addressing a growing need to keep our students safe.

Vote Yes on O to:

• Construct and equip classrooms and career technology facilities at both Coleville High School and Lee Vining High School

• Provide facilities for job skills and career readiness in agricultural science, automotive technology, and skilled trades like welding, carpentry, and mechanics

• Improve school safety and security, including doors, locks, and communication systems at all ESUSD school sites

Measure O is fiscally accountable with built-in taxpayer safeguards:

• Independent citizens' oversight and annual audits

• Detailed project list showing how Measure O funds will be used

• All Measure O funds stay local to support local schools - no funds can be taken away by the State, the County, or used for other purposes

• Funds cannot be spent on administrator or teacher salaries, benefits, or pensions

Good schools benefit us all. They improve property values, provide a better learning environment for students, increase safety, and educate tomorrow's community leaders and service providers. Even if you do not have school-age children, supporting Measure O is a wise investment.

Local Need + Local Investment = Local Benefit

Vote YES on O to invest in local schools and bright futures for Eastern Sierra students.

The undersigned Proponent(s) or Author(s) hereby state that such argument is true and correct to the best of their knowledge and belief.
