Argument in Favor of Measure R

Vote YES on Measure R to keep Pacific Grove's streets, storm drains, parks and coastal trails safe and well-maintained, and to make sure out-of-town visitors help pay for the infrastructure they use every day.

Pacific Grove's revenues have not kept pace with growing costs associated with providing city services and facilities. The City has been proactive by reducing costs and deferring maintenance where feasible. But delaying necessary repairs does not make them disappear, it makes them more expensive.

Our storm drain system, installed 50+ years ago is starting to fail, causing sinkholes, flooding and pollution. The longer we wait, the more we ultimately pay. **Measure R will help close this gap and protect essential city services.**

Measure R establishes a modest 0.375% transactions and use tax. **Every penny stays right here in Pacific Grove and cannot be taken by the State or County.**

Visitors will help cover the cost. The Monterey Peninsula welcomes over 4 million visitors every year, and sales tax is paid by everyone making taxable purchases, not just residents. It is estimated that Pacific Grove will receive $1 million or more in revenue for every $500,000 our residents contribute. For the average resident, that's about $33 a year, a modest investment in protecting our streets, storm drains, parks and public facilities.

Your YES vote on Measure R will:

- Keep local streets, sidewalks, parks and public facilities safe, clean, and well-maintained
- Repair and replace aging infrastructure, including storm drains, streets, sidewalks and curbs
- Keep trash and pollution out of waterways and beaches
- Maintain fire protection, paramedic care and 911 emergency response
- Require independent audits and public disclosure

Vote Yes on Measure R. Fix problems before they become more expensive. Ask visitors to help pay their fair share. Keep the money in Pacific Grove.
