IMPARTIAL ANALYSIS OF MEASURE C

This analysis of the general obligation bond measure for the Shasta-Tehama-Trinity Joint Community College District ("District"), Measure C, is prepared and submitted to the voters in accordance with Elections Code section 9500, et seq. The electors who will be entitled to vote on the measure are those qualified electors who reside within the boundaries of the District. If approved, the issuance of the bonds will be in conformance with the laws of the State of California. Measure C does not propose to amend or add to existing law.

Section 1 of Article XIIIA and section 18 of Article XVI of the California Constitution and Education Code sections 15264 et seq. authorize a community college district to adopt a proposal, subject to the approval of the District's voters, authorizing the issuance of general obligation bonds for specific community college purposes. The District's Board of Trustees has adopted such a proposal and is submitting it to the District electors for their consideration.

If fifty-five percent (55%) of the qualified electors voting on Measure C vote for approval, the District's Board of Trustees would be authorized to issue bonds in the principal amount not to exceed $129,630,000 and to levy ad valorem taxes on taxable property within the District to pay for the amount of bonded indebtedness plus interest. The interest rate on the bonds would not exceed the statutory limit.

The projects to be financed by the bonds may include: (1) repairing, upgrading, renovating or replacing infrastructure, classrooms, equipment, and facilities as described in the full text of the measure (the "Full Text"); (2) upgrading facilities for career training and transfer to universities; (3) constructing classrooms and training facilities; (4) developing a regional training center; (5) upgrading information technology infrastructure and systems; (6) improving safety, disabled access, emergency preparedness, and security systems; (7) other projects listed in the Full Text; and (8) expenses associated with the projects as described in the Full Text. The proceeds will not be used for any purpose not identified in the measure, including teacher or administrator salaries. The District's Board of Trustees shall establish a citizen's oversight committee to ensure that the proceeds of the bonds are spent only on the projects and sites identified in Measure C.

According to the tax rate statement submitted by Dr. Frank Nigro, Superintendent/President of the District, the average annual estimated ad valorem tax which would be required to be levied on taxable real property to repay the bonds over their term would be $7.76 per $100,000 of assessed value. These calculations are estimates only and are not binding upon the District.

If Measure C is not approved by fifty-five percent (55%) of the qualified electors voting on the measure, the District will not be authorized to issue bonds for the aforementioned purposes.

A "yes" vote is to authorize the issuance of the bonds.

A "no" vote is against authorizing the issuance of the bonds.

The above statement is an impartial analysis of Measure C. If you desire a copy of the ordinance or measure, please call the elections official's office at 707-445-7481 and a copy will be mailed at no cost to you.

Argument In Favor Of Measure C

Shasta College is an important asset to our North State communities and should be a top priority. A quality college is important because it provides training and education for better paying jobs, is good for the local economy, and improves the quality of our community. Our instructors and staff do a great job educating local students, but many classrooms and facilities in the Shasta-Tehama-Trinity Joint Community College District are outdated or inadequate to provide students with the facilities they need to succeed.

Although classrooms, labs, and facilities have been well maintained over the years, aging buildings must be upgraded since many do not meet 21st century standards. Shasta College's main campus has classrooms that are almost 60 years old. By investing in Shasta College, we can meet today's technological and educational standards and provide better job-training services to improve our communities for years to come.

Approving Measure C will improve our campuses without increasing tax rates.

Measure C will provide funding to make improvements throughout the District including:
- Constructing a new training facility in Tehama County for welding and agriculture jobs
- Expanding Emergency Medical Services (EMS) and Certified Nursing Assistant (CNA) labs and facilities
- Upgrading inadequate building systems
- Modernizing science and math labs
- Making improvements for students and visitors with disabilities

Measure C makes financial sense and protects taxpayers.
- Will not increase tax rates.
- By law, spending must be annually audited and reviewed by an independent citizens' oversight committee.
- All bond funds must be spent locally and cannot be taken by the State.
- Funds are required to be spent only on local college facilities, not for administrator or instructor salaries.

Without increasing taxes, Measure C upgrades and renovates old and inadequate buildings and provides training and education for better paying jobs. That's something we can all support. Please join us and VOTE YES ON MEASURE C!
