REBUTTAL TO ARGUMENT IN FAVOR OF MEASURE V

The Argument for Measure V never admits that it's a *tax increase*, and never discloses *how much* it increases.

Instead it says Measure V will *generate* revenue, *add* local funding and *give us* resources, as if the money comes from somewhere other than our wallets!

Don't be misled, Measure V raises taxes. It would raise the City's sales tax from **0**.875% to **1**.875% – more than double!

The Argument also boasts, "non-residents who shop in Vacaville will help pay." But many nonresidents shop in Vacaville *because* our sales tax is affordable. If it more than doubles, they will *shop elsewhere*. This *hurts* Vacaville businesses.

Because the proponents are already hiding full information by using evasive terms and half-truths, we cannot trust their claim that Measure V "requires clear transparency."

Proponents say Vacaville needs higher taxes "due to decreased revenues" but never explain how revenues could have decreased. Vacaville receives revenue from:

- County property taxes
- State road taxes on gasoline
- Existing sales taxes
- Excise tax on water and sewer
- Franchise fee on trash collection
- The property transfer tax
- Hotel taxes
- Business license taxes
- Measure G tax
- Developer fees

Revenue from all these steadily *grows* as property values increase, new homes are added, new businesses open, population expands, property sells, the price of goods and utilities rise, etc.

Despite all this growing revenue, and despite voters having already increased sales taxes twice, the City again wants more money. Tell them to make do, or at least propose less. **Vote NO on Measure V.**
