Argument in Favor of Measure B

Winters Joint Unified School District

Every student deserves to learn in quality school facilities. Strong schools boost student achievement, increase property values, prepare our children for successful careers, and help create safer neighborhoods. Although our teachers and staff do a great job educating local students, many classrooms and school facilities in the Winters Joint Unified School District are outdated and inadequate to provide students with the proper school facilities they need to succeed.

Although our schools have been well maintained over the years, aging classrooms and facilities must be upgraded since many do not meet 21st-century educational and technological standards. Measure B would allow the District to improve our local schools and the quality of education provided to local students. By investing in our schools, we can meet today's safety, technological, and educational standards and improve our community.

If passed, Measure B will provide funding to make critical facility improvements at Winters schools by:

- Repairing or replacing leaky roofs
- Modernizing/renovating outdated classrooms, restrooms, and school facilities
- Repairing or replacing deteriorating plumbing and sewer systems
- Making health, safety and handicapped accessibility improvements
- Improving student access to computers or modern technology

Measure B makes financial sense and protects taxpayers.

- By law, spending must be reviewed and annually audited by an independent citizens' oversight committee.
- All bond funds must be spent locally and **cannot be taken by the State.**
- Funds are required to be spent only on schools, not for administrator or teacher salaries.

Measure B upgrades and renovates old and inadequate classrooms, improves the education of local students, and maintains the quality of our community. That's something we can all support. Please join us and **VOTE YES ON MEASURE B!**
