Argument in Favor of Measure CL

Vote YES for Responsible Four-Term Limits

South El Monte is one of the few cities that currently has **no term limits** for its elected City Council members. Measure CL changes that by establishing a reasonable limit of **four four-year terms**, ensuring that no one can serve indefinitely while preserving the experience needed to lead our city effectively.

This measure strikes the right balance between accountability and stability. Twelve or sixteen years may sound like a long time, but major projects that improve neighborhoods, strengthen public safety, repair infrastructure, attract new businesses, and maintain the City's financial health often take many years to complete. Experienced leadership helps ensure these long-term investments are carried through to completion.

Most importantly, Measure CL does **not** guarantee anyone another term. Every councilmember must continue earning the trust of voters in every election. If residents believe it is time for a change, they already have the power to elect someone new. Elections remain the strongest form of accountability.

At the same time, adopting four-term limits ensures that no individual can remain in office forever. It creates a clear, reasonable limit while allowing dedicated public servants enough time to gain experience, solve complex challenges, and deliver meaningful results for our community.

This is not about protecting politicians—it is about creating good governance. It gives voters the benefit of experienced leadership while guaranteeing future opportunities for new candidates to serve. By adopting term limits for the first time, South El Monte joins many communities that have chosen a balanced approach over unlimited service or overly restrictive limits.

Measure CL promotes accountability, stability, and responsible leadership while keeping the decision where it belongs—with the voters.

Vote YES on Measure CL for reasonable four-term limits and a stronger future for South El Monte.
