MEASURE E

CENTER JOINT UNIFIED SCHOOL DISTRICT – SCHOOL BOND MEASURE

To upgrade local schools; improve school and student safety; replace leaky roofs and decaying pipes; replace failing heating and cooling systems; and update hands-on science and early job training classrooms and accommodate growing enrollment, shall Center Joint Unified School District's measure authorizing $197 million in bonds, at legal rates, levying approximately $60 per $100,000 assessed value, (averaging $12,300,000 annually) while bonds are outstanding, with citizen oversight and audits, all funds staying local and none for administrator salaries, be adopted?

BONDS YES ____ BONDS NO ____

COUNTY COUNSEL'S IMPARTIAL ANALYSIS OF MEASURE E

Prepared by County Counsel

The California Constitution and Education Code authorize school districts to issue bonds for specified purposes if approved by the voters within district boundaries. Measure E was placed on the ballot by the governing board of the Center Joint Unified School District ("District"). If approved, Measure E would allow the District to incur bonded indebtedness up to a maximum amount of $197 million dollars. The proceeds from the issuance and sale of such general obligation bonds could only be used for the acquisition, construction, reconstruction, rehabilitation and/or replacement, including furnishing and equipping of District facilities. Measure E lists the specific school facilities projects that the District intends to finance by the proposed bond sales.

No funds derived from bond sales may be used for general school operating expenses, including administrator and teacher salaries or pensions, or for any purpose or project other than those expressly stated in the measure.

To ensure that funds are spent only as specified in the measure, Measure E requires: 1) the appointment of a citizen's oversight committee; and 2) completion of annual independent performance and financial audits.

If Measure E is passed, the actual dates of sale and the amount of bonds sold would be governed by the District based on the need for construction funds and other factors. If Measure E is approved, the tax rates necessary for payment of principal and interest on any bonds sold will largely be dictated by the timing of the bond sales, the amount sold at a given sale, market interest rates at the time of each sale (although in no event greater than the maximum bond interest rate allowed by law), as well as actual assessed valuation of taxable property in the District over the term of repayment. The District's Tax Rate Statement contains the best estimates of tax rates required to service the bond debt. The District estimates the average annual tax rate levy to fund this bond is $54.94 per $100,000 of assessed valuation. The final fiscal year in which the tax is anticipated to be collected will be 2068-69. The District estimates that the total amount repayable during the life of the bond, including principal and interest, is approximately $517 million dollars.

Passage of Measure E requires approval by 55% of the voters voting thereon.

A "YES" vote on Measure E means you wish to allow the District to issue bonds in an amount not to exceed $197 million dollars.

A "NO" vote on Measure E means you do not wish to allow the District to issue the proposed bonds.

ARGUMENT IN FAVOR OF MEASURE E

Vote YES on E to support quality education in Center Joint Unified School District schools **WITHOUT INCREASING TAXES.**

Some of our classrooms and school facilities are over 65 years old and need urgent repairs and updates to meet current academic, health, and safety standards. Measure E will allow for essential repairs and upgrades to school roofs, windows, water and sewer systems, and HVAC *before repairs become more costly down the road*.

Nothing is more important than ensuring our children are safe at school. Voting YES on E will **improve student safety and campus security** by modernizing door locks, installing cameras to control access better, and reconfiguring student pickup and drop-off areas on school campuses.

Measure E will provide classrooms that meet today's standards for science, technology, engineering, math, and job and career readiness programs so that **our graduates are well-prepared to become leaders in college and the future workforce.**

Vote YES on E to:

- Repair leaky roofs, windows, and decaying water and sewer pipelines
- Upgrade or replace failing HVAC systems to ensure healthy classrooms
- Update hands-on science, technology, engineering, math, and early job training classrooms
- Accommodate growing enrollment
- Replace deteriorating portable classrooms with permanent classrooms

Measure E is fiscally accountable:

- Tax rates **will not increase above what we already pay**
- An independent citizens' oversight committee, annual audits, and a detailed project list ensure funds are spent as promised
- All funds stay local to support local schools
- Funds cannot be spent on administrators' salaries or pensions

Our community is growing fast – now is the time to plan for the future. Measure E will ensure our community has the school facilities needed to meet the demand, without allowing overcrowding to impact the quality of student education.

Vote YES on E to support high-quality education WITHOUT INCREASING TAX RATES.

Signed,
Steve Jackson, Retired Educator; Heritage Placer Vineyard Resident
Yvonne Leggett, CJUSD Parent Leader
Jeri Wartena, Retired 28-Year CJUSD Employee; Community Advocate
Kevin Kelly, Community Resident & Volunteer
Kourtney Hobart, CJUSD Citizens' Bond Oversight Committee Member

NO ARGUMENT AGAINST MEASURE E WAS SUBMITTED

FULL TEXT OF MEASURE E SUBMITTED BY CENTER JOINT UNIFIED SCHOOL DISTRICT

PROJECT LIST

The Board of Trustees of the Center Joint Unified School District (the "District") certifies that it has evaluated the District's urgent and critical school needs, including school and student safety issues, enrollment trends, class size reduction, overcrowding, energy efficiency and computer technology, seismic safety requirements, and aging, outdated or deteriorating school buildings in developing the scope of projects to be funded. The Board of Trustees will prioritize the key health and safety and sustainability needs so that the most critical school site needs are addressed. The District conducted an evaluation at all school sites and received public input in developing the scope of school projects to be funded. The exact size, configuration and location of each project will be determined by the Board of Trustees based on the needs of the District.

The Board of Trustees has made the following key findings:

- The District is committed to providing quality education to its students, from TK/Kindergarten through 12th grade at its eight school sites.
- Dedicated teachers and staff strive to deliver rigorous academic programs, personalized instruction, and a variety of extracurricular activities to serve the diverse communities and talents of the students.
- District schools are aging and need repairs, such as replacing aging plumbing and electrical systems, repairing leaky roofs, updating HVAC systems and helping meet current school safety and academic standards.
- The District also serves a community in one of California's fastest growing regions and is experiencing significant growth in student enrollment, and needs to construct new schools, classrooms, and district facilities to serve these students.
- A local funding source, such as a school improvement bond measure, could enable the District to provide new and upgraded school facilities for its present and future students.
- A bond measure would provide funds for essential improvements and repairs, such as improving school and student safety and security, replacing portable classrooms that have exceeded their usable lifespans, updating hands-on science and early job training classrooms, and helping prepare the District for the growing student population.
- The District conducted and adopted a comprehensive Facilities Master Plan that identifies the updates needed at each school site, meets the District's goals for supporting current academic standards, and addresses specific priorities at individual school sites.
- Funding from the State of California is not sufficient to serve the District's current and growing population, and the limited State dollars available for facility upgrades typically take years and require local matching funds that could be provided by a local bond measure.
- This school bond improvement measure could qualify our schools for millions in State matching funds that would otherwise go to other school districts.
- This bond measure includes strict accountability, including the appointment of an independent citizens' oversight committee and annual audits to ensure all funds are spent locally as promised.

In approving this Project List, the Board of Trustees determines that the District should:

(i) Upgrade classrooms and other support facilities to support the District's academic programs, including math, science, reading and writing.

(ii) Qualify for State matching grant funds,

(iv) Purchase school facilities as needed, or those currently being leased,

(iii) Adhere to specific **FISCAL ACCOUNTABILITY** safeguards such as:

(a) All expenditures will be subject to annual independent financial and performance audits.

(b) All funds will be subject to <u>local control</u> and provide improvements at District facilities and schools.

(c) No funds will be used for administrators' salaries and pensions.

(d) An independent citizens' oversight committee will be appointed to ensure that all funds are spent only as authorized.

The Project List includes the following types of projects:

- Make repairs to protect the community's long-term investment in District facilities, including fixing leaky roofs, decaying water and sewer pipelines, failing heating, ventilation and air conditioning systems, repairing damaged pavement, and replacing substandard security gates;
- Modernize or reconstruct existing permanent classrooms at our oldest schools or construct new classrooms, schools, and other district facilities, including labs, school support facilities, cafeterias, multipurpose rooms, and libraries;
- Replace portable classrooms and older schools with new permanent facilities;

- Construct, equip and furnish school facilities as permitted, including new school facilities;
- Reconfigure, renovate and modernize classroom to accommodate modern classroom technology, including upgraded furnishings, fixtures, and equipment designed to transform the functionality of learning spaces;
- Update hands-on science and early job training classrooms, including career technical education facilities;
- Construct, renovate, remodel, equip and furnish student support facilities, including but not limited to libraries and student resource centers;
- Provide infrastructure and technology to better serve students in the digital age and increase their academic achievement;
- Construct, renovate, remodel, equip and furnish improvements to play areas and restrooms, including to ensure access for students and staff with disabilities; and
- Address unforeseen conditions revealed during construction/modernization activities (e.g., plumbing or gas line breaks, dry rot, seismic or structural concerns, removal of asbestos, etc.) and perform necessary sitework in connection with new construction or renovation, and fund deferred maintenance as permitted by law.

In addition to the listed projects stated above, bond proceeds may also be spent on the acquisition of a variety of instructional, maintenance and operational equipment, the construction of new schools, new classrooms and other new school facilities and District facilities, reconstruction, rehabilitation and repair of existing classrooms, school facilities and District facilities, all of which may include, but not be limited to, some or all of the following: construction, repair and/or renovation of student and staff restrooms; installation, repair and replacement of heating, air conditioning and ventilation systems; construction, installation, repair, modernization and upgrade of facilities for energy efficiency and to reduce costs and fire risks; installation, construction, repair and replacement of worn-out and leaky roofs, ceilings, windows, walls, doors and drinking fountains, including for energy efficiency or compliance with code or State or federal law; installing and modernizing interior and exterior floor covering; painting interior and exterior of facilities; installation, repair and upgrade of interior and exterior lighting systems; installing or rehabilitating covered walkways; installation of signage, bells and clocks; installation and upgrades of wiring and electrical systems to safely accommodate computers, technology and other electrical devices and needs, including replacement or addition of additional electrical service capacity; deferred maintenance projects; installation, repairing and replacing fire and smoke alarms, emergency communications and security systems; surfacing, resurfacing or replacing of hard courts, turf (including artificial turf), and fields; installation, repair or refurbishment of play apparatus and surfaces, and other play areas and fields, including to meet current safety requirements; constructing, installation, modernization, upgrade, replacement or refurbishing of irrigation systems, sprinklers and landscaping; building new and/or renovating existing physical education facilities, including gymnasiums, pools and aquatic facilities, stadiums, including installation of modern scoreboards, audio-visual equipment, and lighting of stadiums and other athletic facilities, replacement or purchase of athletic and aquatic furnishing and equipment, upgrading or construction of locker rooms, changing facilities, showers, bleachers and seating areas, concession spaces and box offices; installation or rehabilitation of lunch shelters; construction, reconstruction, upgrading, modernization, rehabilitation or replacing libraries, cafeterias, kitchens, nutrition services facilities, support spaces, multipurpose rooms, childcare facilities, laboratories, adult education facilities, district offices and administrative spaces; construction, reconstruction, upgrading, modernization, rehabilitation or replacing of performing arts spaces and music and art studios, including stage and backstage areas, scene shops, costume shops, dressing rooms, rehearsal spaces, seating, lighting systems, sound systems, recording systems, orchestra pit, public lobby, box office, and other related services and other furnishings and equipment appropriate for modern music, theater and art programs; improving sanitation and recycling; construction, reconstruction, repair and modernization of administrative support spaces and district offices; leasing or purchase of land for expansion or construction of parking lots, drop-off and pick-up areas, and other transportation facilities, including for staff parking and school buses; demolition of facilities to make room for new construction or reconstruction, and demolition of unsafe facilities; construction and reconstruction of various forms of storage and support spaces; removing and replacement of portable classrooms; upgrading, installing and replacing water and sewer lines and other plumbing systems; and replacing outdated security systems. The District may construct, install, upgrade, repair, replace or rehabilitate safety and security systems in connection with any of the projects listed herein, including security doors, fencing, lighting, security cameras and closed-circuit systems, gates, door locks and centralized lockdown systems, emergency exits, emergency communications systems, emergency power, smoke detectors, fire alarms and sprinklers, safety doors, and other security devices and systems. Any project herein may include construction or reconstruction of any facilities to comply with accessibility requirements under the Americans with Disabilities Act; the removal or abatement of asbestos, lead paint, mold or other hazardous materials; or improvements to meet State seismic and other structural integrity standards.

The District may construct facilities to serve students and reduce class sizes, as well as upgrading schools to provide competitive and modern learning environments and to prepare students for high school, college and careers and improve student access to instruction in science, technology, engineering, the arts and math. The upgrading of technology infrastructure and modernization of facilities includes all District facilities, including and not

limited to, classrooms, labs, libraries, office and support spaces, and includes the installation, construction, upgrade and refurbishment or all necessary infrastructure, hardware and software and modern technology devices and instructional aides and devices, including but not limited to wiring and electrical systems, monitors, computers, tablets, modern projectors, portable interface devices, racks, servers, switches, routers, modules, wireless systems, sound projection, access control systems, printers, digital white boards, document projectors and cameras, videoconferencing equipment, upgraded voice-over IP, communications systems and call managers, collaborative systems, network management software, enterprise-wide software system replacements or upgrades, cabling, wiring, fiberoptics, wi-fi capabilities, access points, and network security/firewall, media control stations, centralized storage and backup systems, uninterruptible power supplies, and other miscellaneous equipment and software, and other modern equipment conducive to a modern learning environment or to increase bandwidth and internet access.

Listed building construction, repair and rehabilitation projects and upgrades may be completed as needed. Each project is assumed to include its share of furniture, equipment, architectural, engineering, and similar planning costs, program/project management, staff training expenses and a customary contingency for unforeseen design and construction costs. It also includes the acquisition of land, payment of the costs of preparation of all facility planning, facility assessment reviews, facility master plan updates, environmental studies (including environmental investigation, remediation and monitoring) and construction documentation, acquiring and leasing of real property for school facilities or new construction, and acquiring and leasing of property for temporary housing of dislocated District activities caused by bond projects. Proceeds of the bonds may be used to fund design, engineering and program management costs, as well as to make lease payments for leases, or to purchase authorized leased facilities, and may also be used to fund the cost of issuing the bonds, certain allowable election costs, and the cost of obtaining and disseminating information, as authorized under State law. The District may acquire real property for school facilities (including the acquisition of leases of real property or leasing of such property), including the purchase of leased facilities and the refinancing of outstanding lease obligations of the District, which may include the prepayment, refunding, or exercise of purchase options for certificates of participation, lease revenue bonds, or other lease obligations or debt instruments, any of which may be currently existing or which may exist in the future.

When specific projects are included in the above list, they are presented to provide examples and are not intended to limit the generality of the broader description of authorized projects. The order in which particular projects are listed is not intended to indicate priority for funding or completion. Projects at each site will be accomplished to address the individual site deficiencies and priorities as enumerated in the District's facilities master plan and as determined by the Board of Trustees. The building construction, repair and rehabilitation projects and upgrades listed herein will be completed as needed.

The allocation of bond proceeds may be affected by the District's receipt of State matching funds and the final costs of each project. Approval of Measure E does not guarantee that the proposed Project or Projects within the District that are the subject of bonds under Measure E will be funded beyond the local revenues generated by Measure E. The District's proposal for the project or projects may assume the receipt of matching state funds, which could be subject to appropriation by the Legislature or approval of a statewide bond measure. In the absence of State matching funds, which the District will aggressively pursue to reduce the District's share of the costs of the projects, the District may undertake fewer than all of the projects listed above.

Any of the projects listed herein may be completed as a joint use project in conjunction with other public education, city, county, or college institutions, including libraries, childcare centers, multipurpose rooms, gymnasiums, athletics or physical education facilities, classrooms, and facilities for business development and career technology centers, all as determined by the Board of Trustees. The District may also pursue public-private partnerships or partnerships with nonprofit organizations or entities to complete any of the projects listed herein and reduce costs to the District, in compliance with applicable law and at the direction of the Board of Trustees.

The final cost of each project will be determined as plans are finalized, construction contracts are awarded and projects are completed. Based on the final costs of each project, certain projects described above may be delayed or may not be completed. Demolition of existing facilities and reconstruction of facilities scheduled for new construction, repair and upgrade may occur, if the Board of Trustees determines that such an approach would be more cost-effective in creating more enhanced and operationally efficient campuses. Necessary site preparation/restoration may occur in connection with new construction, renovation or remodeling, or installation or removal of relocatable classrooms, including ingress and egress, removing, replacing or installing irrigation, storm drain, and utility lines, trees and landscaping, relocating fire access roads, and acquiring any necessary easements, licenses, or rights of way to the property. Proceeds of the bonds may be used to pay or reimburse the District for the costs of District staff when performing work on or necessary and incidental to bond projects. Bond proceeds shall only be expended for the specific purposes identified herein Projects financed with bond proceeds will be subject to oversight of a professional construction/program management firm. In addition, authorized projects include reimbursements for paid project costs and paying and/or prepaying interim or previously obtained financing for the types of projects included on the project list, such as bond anticipation notes or lease financings including certificates of participation relating to facilities projects and/or equipment previously financed.

As required by the California Constitution, the proceeds from the sale of the bonds will be used only for the provision of school facilities by construction, reconstruction, rehabilitation, refinancing or replacement of school facilities, including the furnishing and equipping of school facilities, or the acquisition or lease or real property for school facilities, and not for any other purpose, including teacher and administrator salaries and other school operating expenses.

The District will conduct an annual, independent performance audit to ensure that the funds have been expended only on projects included in the Project List set forth above.

The District will conduct an annual, independent financial audit of the proceeds from the sale of the bonds until all of those proceeds have been expended on projects included in the Project List set forth above.

Pursuant to Section 15772 of the Education Code, the Board will appoint a citizens' oversight committee and conduct annual independent audits to assure that bond proceeds are spent only on projects included in the Project List set forth above and for no other purposes.

NO ADMINISTRATOR SALARIES. PROCEEDS FROM THE SALE OF THE BONDS AUTHORIZED BY THIS PROPOSITION SHALL BE USED ONLY FOR THE ACQUISITION, CONSTRUCTION, RECONSTRUCTION, REHABILITATION, OR REPLACEMENT OF DISTRICT FACILITIES, INCLUDING THE FURNISHING AND EQUIPPING OF FACILITIES, AND NOT FOR ANY OTHER PURPOSE, INCLUDING PENSIONS, TEACHER AND SCHOOL ADMINISTRATOR SALARIES AND OTHER OPERATING EXPENSES.

FISCAL ACCOUNTABILITY. THE EXPENDITURE OF BOND MONEY ON THESE PROJECTS IS SUBJECT TO STRINGENT FINANCIAL ACCOUNTABILITY REQUIREMENTS. BY LAW, PERFORMANCE AND FINANCIAL AUDITS WILL BE PERFORMED ANNUALLY, AND ALL BOND EXPENDITURES WILL BE MONITORED BY AN INDEPENDENT CITIZENS' OVERSIGHT COMMITTEE (EDUCATION CODE SECTION 15278 ET SEQ.) TO ENSURE THAT FUNDS ARE SPENT AS PROMISED AND SPECIFIED. THE CITIZENS' OVERSIGHT COMMITTEE MUST INCLUDE, AMONG OTHERS, REPRESENTATIVES OF A BONA FIDE TAXPAYERS ASSOCIATION, A BUSINESS ORGANIZATION AND A SENIOR CITIZENS ORGANIZATION. NO DISTRICT EMPLOYEES OR VENDORS ARE ALLOWED TO SERVE ON THE CITIZENS' OVERSIGHT COMMITTEE.

TAX RATE STATEMENT PREPARED BY THE DISTRICT

An election will be held in Center Joint Unified School District (the "District") on November 3, 2026, for the purpose of submitting to the electors of the District the question of issuing bonds of the District in the principal amount of $197,000,000. If such bonds are authorized and sold, the principal thereof and interest thereon will be payable from the proceeds of taxes levied on the taxable property in the District. The following information regarding tax rates is given in compliance with Section 9401 of the California Elections Code. This information is based upon the best estimates and projections presently available from official sources, upon experience within the District and other demonstrable factors.

Based upon the foregoing and projections of the assessed valuations of taxable property in the District, and assuming the entire debt service on the bonds will be paid through property taxation:

1. The best estimate from official sources of the average annual tax rate that would be required to be levied to fund the bond issue over the entire duration of the bond debt service, based on estimated assessed valuations available at the time of the filing of this statement, or on a projection based on experience within the District or other demonstrable factors, is $54.94 per $100,000 of assessed valuation of all property to be taxed. The final year in which the tax is anticipated to be collected is 2068-69.

2. The best estimate from official sources of the highest tax rate that would be required to be levied to fund the bond issue, and an estimate of the year in which that rate will apply, based on estimated assessed valuations available at the time of the filing of this statement, or on a projection based on experience within the District or other demonstrable factors, is 60.00 per $100,000 of assessed valuation of all property to be taxed and the fiscal year is 2031-32.

3. The best estimate from official sources of the total debt service, including principal of and interest on the bonds, that would be required to be repaid if all of the bonds are issued and sold under the authorization, is $516,728,015.

Attention of voters is directed to the fact that the foregoing information is based upon projections and estimates. The actual timing of sales of the bonds and the amount to be sold at any time will be governed by the needs of the District and other factors. The actual interest rates at which the bonds will be sold, which will not exceed the maximum permitted by law, will depend upon the bond market at the time of sale. The actual assessed valuations in future years will depend upon the value of property within the District as determined in the assessment and the equalization process. Assessed valuation is not the same as market price of real property. Therefore, the actual tax rates and the years in which those tax rates will be applicable may vary from those presently estimated and stated above.
