FULL TEXT OF MEASURE G

GALT JOINT UNION HIGH SCHOOL DISTRICT
REPAIR, SAFETY, AND STUDENT JOB TRAINING MEASURE

INTRODUCTION

The Galt Joint Union High School District was established in 1911 and serves the Galt community and dozens of surrounding communities, located at the southern end of Sacramento County and including portions of northern San Joaquin County. The District serves a student population approaching 2,000 high school students at Galt High School, Liberty Ranch High School, and Estrellita High School.

The District takes pride in its neighborhood high schools, which are the heart of the communities in Galt and the surrounding areas. The District is dedicated to advancing the academic and physical, social, and personal skills of the community's high school students, and to its mission of maximizing opportunities and pathways for students as they prepare and progress to college and successful careers. Our excellent teaching staff are a critical part of this mission.

Quality education requires quality and modern facilities. Upgrading and repairing aging facilities, and providing space and technology necessary for modern high school instruction, will help the District attract and retain the best teachers.

The District diligently maintains the high schools. Many urgently needed projects, however, cannot be addressed through routine maintenance alone. Leaky roof systems, deteriorating bathrooms and plumbing systems, and asbestos and mold in facilities built during prior eras, must be addressed with local funding. In addition, upgrades are needed to fire, security, and electrical systems, and classrooms need upgrades and repairs to provide modern facilities. Aging sewer and gas lines need repairs and replacement. Aging portable classrooms must be replaced.

When these issues go unaddressed, the cost of repairs and upgrades rises exponentially.

This measure will help upgrade all our local high schools' outdated classroom electrical systems, technology and vocational classrooms and labs that provide training opportunities, with a greater emphasis on twenty-first-century education in science, computers, engineering and math. This investment in our local students will prepare them to be competitive and thrive as they move onto college, and enable students who choose not to go to college to acquire real-world skills and compete for jobs when they graduate. Career technical education helps area students prepare for work in skilled trades such as construction, electrical engineering, welding, plumbing, and agricultural careers.

This measure will address the most urgent repairs facing our neighborhood high schools such as repairing leaky roofs; removing asbestos and mold; repairing aging bathrooms and plumbing; and upgrading outdated electrical wiring and heating and ventilation systems.

The District still has classroom trailers housing students, including some that have been in use for nearly 40 years, well past their recommended lifespan. Local funding is needed to replace outdated portables with permanent classrooms to ensure our students can learn in reliable, well-ventilated, and technologically up-to-date academic settings.

Neighborhood high schools have outdated security and safety features, including aging locks, alarms, and cameras, and do not have adequate security fencing and lighting and emergency communications systems.

The District last asked the community to support District facilities with a bond measure in 2016. Ten years later, those funds have been spent effectively and efficiently, saving taxpayers millions of dollars, yet aging facilities and technologies still need to be addressed.

The State of California requires a local match, funded primarily through local, general obligation bonds, for school districts wishing to pursue matching state funds for the upgrade or replacement of school buildings and facilities. The millions of dollars potentially available through the State match allows local taxpayers to benefit from the tax dollars they already pay to the State.

Local funding is a critical and necessary component of school facilities funding, and local support is needed to ensure our students have the educational opportunities they deserve, and a school environment the community can take pride in.

All funds from a school bond measure must be spent on classroom and facility upgrades and repairs at Galt High School, Estrellita High School, Liberty Ranch High School, and other District facilities, and cannot be used for administrator salaries or pensions. Additionally, funding from this measure cannot be taken by the State.

This bond measure is subject to strict accountability requirements,

including public disclosure of all spending, independent annual audits, and review of all spending by an Independent Citizens' Oversight Committee.

SUMMARY STATEMENT OF MEASURE

Galt Joint Union High School District, Repair/Safety and Vocational Training Measure. To upgrade classrooms to maintain quality education/school safety by preparing students for skilled trades including welding/construction/plumbing; repairing leaky roofs; removing asbestos/mold; shall Galt Joint Union High School District's measure be adopted, authorizing $43,000,000 in bonds at legal rates, levying $30 per $100,000 of assessed valuation, generating $3,100,000 annually, while bonds are outstanding, prohibiting funds for administrators salaries/pensions, requiring independent citizens' oversight, audits, all funds locally controlled?

As required by the California Constitution, the proceeds from the sale of the bonds will be used only for the purposes authorized under Article XIIIA of the California Constitution, including construction, reconstruction, rehabilitation, or replacement of school facilities, furnishing and equipping of school facilities, or the acquisition or lease of real property for school facilities, as specifically set forth in this Measure, and costs incident thereto, and not for any other purpose, including salaries and other routine school operating expenses.

The following list describes the specific projects the District proposes to finance with proceeds of the bonds. The scope of specific projects, the order of construction, and their completion is contingent on final project costs and the availability of needed funds. Further, projects on the project list are of the type that issuing the authorized general obligation bonds as stated will not cause the State to reduce any financial hardship contribution that would otherwise be available to the District had these bonds not been authorized, issued, and or expended for their stated purpose.

SCHOOL FACILITIES PROJECTS TO BE FUNDED FROM BOND PROCEEDS

The following list includes both projects that can be completed using the bond proceeds, along with State matching funds and other building funds the District is projected to receive and projects that are planned and needed but whose construction is contingent on the amount of bond funds available, plus the amount of State matching and other building funds the District may receive in the future, which is a function of the State building program rules, passage of State bonds, and the growth rate of the District. The completion of specific projects is also contingent on final project costs.

All District Sites, including but not limited to:

GALT HIGH SCHOOL, built in 1927, located at 145 North Lincoln Way
ESTRELLITA HIGH SCHOOL, built in 2007, located at 12935 Marengo Road
LIBERTY HIGH SCHOOL, built in 2009, located at 12945 Marengo Road

- Renovate, modernize, or relocate classrooms and school facilities to provide adequate learning environments.
- Make health, safety, and security improvements, including installation of outdoor shade structures, upgrades and repairs to fire safety systems, security/alarm systems and door locks, emergency communication and intercom systems, security cameras, seismic retrofitting, structural improvements, and mold/asbestos remediation where needed in existing facilities.
- Replace, repair, and/or modernize deteriorating and leaky roofs, leaking pipes, outdated plumbing, sewer, storm drainage, water, technology, and gas systems.
- Seal, repair, or replace outdated windows.
- Make energy efficiency upgrades including lighting replacement and retrofitting.
- Upgrade, replace, or repair water supply systems to ensure clean drinking water.
- Renovate and upgrade, and/or construct, bathroom facilities.
- Upgrade, replace and/or repair inadequate technology and electrical systems including wiring, panels, and infrastructure.
- Abate and remove hazardous materials and address unforeseen conditions revealed by construction/ modernization (such as plumbing or gas line breaks, dry rot, seismic, structural, mold, asbestos, and other hazardous materials, and decaying walls.)
- Replace aging portable classrooms.
- Upgrade, expand, or construct gymnasium and athletic facilities, including bleachers, lighting, and concession facilities, including replacement or acquisition of physical education fields, indoor and outdoor athletic fields, tracks, bleachers, locker rooms, lighting, irrigation, and drainage.
- Acquire, install, repair and/or replace heating, air conditioning and ventilation systems.
- Update, repair, and/or replace exterior building envelopes, including periodic coating, sealing, and painting
- Repair, repave or replace deteriorating asphalt, concrete, sidewalks, parking lots, driveways and walkways.
- Repair, and install additional fencing and gates to improve campus security.
- Update facilities to comply with federal and state-mandated Americans with Disabilities Act (ADA) accessibility requirements and as mandated by the Division of the State Architect (DSA) including site access, parking, restrooms, relocation of some existing electrical devices, drinking fountains, etc.
- Construction, renovation, or remodeling, replacement, or installation or removal of classrooms and school facilities including relocatable classrooms, including ingress and egress, removing, replacing, or installing landscaping, irrigation, utility lines (such as gas lines, water lines, electrical lines, sewer lines, and communication lines), trees

and landscaping, relocating fire access roads, and acquiring any necessary easements, licenses, or rights of way to the property.

- Rental or construction of storage facilities and other space on an interim basis, as needed to accommodate construction materials, equipment, and personnel, and interim classrooms (including relocatables) for students and school functions or other storage for classroom materials displaced during construction.

- All work necessary and incidental to specific projects described above, including demolition of existing structures.

Approval of the District's bond measure does not guarantee that all of the identified projects within this bond project list will be funded. The District plans to pursue funds from the State of California, if available, to complete certain of the identified facilities projects. The District is unable to anticipate all unforeseen circumstances which may prevent some of the projects listed above from being undertaken or completed.

The order in which projects are listed in the foregoing bond project list does not suggest an order of priority. Project prioritization is vested in and will be determined by the District Board of Trustees. Bond proceeds shall only be expended for the specific purposes identified herein. The District shall create an account into which proceeds of the bonds shall be deposited and comply with the reporting requirements of Government Code section 53410.

The Board of Trustees hereby certifies that it has evaluated the safety, class-size reduction, and information technology needs of the District in developing this list of school facilities projects.

Each of the bond projects described in this bond project list include the costs of furnishing and equipping such facilities, and all costs which are incidental but directly related to the types of projects described above. The bond projects described in the project list may be completed at any or all District sites, and projects completed at such sites may include any portion of the campus or District-owned property, including school or District administration offices.

These projects may include participation in the State Facility Program's Joint-Use Program to gain matching funds for teacher education, multi-purpose rooms, gymnasiums, libraries, childcare, and other qualifying Joint-Use facilities. With respect to such joint-use projects, the bond funds authorized by this Measure may be used to pay all of the local share needed to qualify the projects for special State matching funds under the State Facility Program's Joint-Use Program requirements.

ACCOUNTABILITY MEASURES

If the bonds are approved, the Board of Trustees will implement the following accountability measures in accordance with State law:

(a) Use the bond proceeds only for the purposes authorized under Article XIIIA of the California Constitution, including construction, reconstruction, rehabilitation, or replacement of school facilities, furnishing and equipping of school facilities, or the acquisition or lease of real property for school facilities and related uses, as specifically set forth in this Measure, and costs incident thereto, and not for any other purpose, including salaries and other routine school operating expenses;

(b) Conduct an annual, independent performance audit to ensure that the bond proceeds have been expended only on the projects and uses listed in this Measure;

(c) Conduct an annual, independent financial audit of the proceeds from the sale of the bonds until all of those proceeds have been expended for school facilities projects and uses listed in this Measure; and

(d) Establish and appoint members to an independent citizens' oversight committee to ensure the bonds are used only for the projects and uses listed in this Measure.

STATE MATCHING FUNDS.

California Education Code section 15122.5 requires the following statement to be included in this Measure and provided to the voters:

> Approval of this bond measure does not guarantee that the proposed projects in the Galt Joint Union High School District that are the subject of bonds under this measure will be funded beyond the local revenues generated by this bond measure. The District's proposal for certain of the projects assumes the receipt of matching state funds, which are subject to appropriation by the Legislature or approval of a statewide bond measure.

ANNUAL TAX AMOUNT, RATE, AND DURATION

The bonds shall bear interest at an annual rate not exceeding the statutory maximum. The maturity of the bonds shall not exceed the maximum term allowed by law at the time of issuance (currently 25 years if issued under Education Code section 15140, or 40 years if issued under Government Code section 53508, so long as the bonds are not capital appreciation bonds ("CABs," which CABs are limited to 25 years)). Accordingly, as further set forth in the tax rate statement, the *ad valorem* tax will be levied at such rates and for so long as may be required to meet the debt service needs of the bonds proposed to be issued, including such bonds that may be issued to refund any approved bonds.

* * *

To the extent permitted by law examples of incidental costs include, but are not limited to: costs of design, engineering, architect and other professional services, facilities assessments, inspections, site preparation, utilities, landscaping, construction management and other planning and permitting, legal, accounting and similar costs; independent annual financial and performance audits; a customary construction contingency; demolition and disposal of existing structures; the costs of interim housing and storage during construction including relocation and construction costs incurred relating to interim facilities; rental or construction of storage facilities and other space on an interim basis for materials and other equipment and furnishings displaced during construction; costs of relocating facilities and equipment as needed in connection with the projects; interim classrooms and facilities for students, administrators, and school functions, including modular facilities; federal and state-mandated safety upgrades; addressing unforeseen conditions revealed by construction/modernization and other necessary

improvements required to comply with existing building codes, including the Field Act; access requirements of the Americans with Disabilities Act; costs of the election; project construction oversight, management and administration during the duration of such projects, including by District personnel, and bond issuance costs.

Unforeseen conditions may arise during the course of planning, design and construction resulting in the scope and nature of any of the specific projects described above being altered by the District. In the event that the District determines that, with respect to a modernization or renovation project, it is more economical for the District or otherwise in the District's best interests to be undertaken as new construction, this bond measure authorizes said new construction, including land acquisition, relocation, expansion and construction and/or reconstruction, and all costs relating thereto. Conversely, if the District determines that it is more economical or otherwise in the best interests of the District to modernize or renovate District facilities instead of undertaking a new construction project, this bond measure authorizes such a project. In addition, this measure authorizes the acquisition of real property, including necessary rights of ways or other real property interests, required to expand District facilities, to provide access to school or other District facilities, or to provide additional school or related facilities. Further, authorized projects include reimbursements for project costs previously paid and paying and/or prepaying interim financing for the types of projects included on the project list, such as bond anticipation notes. Finally, projects on this list may be undertaken and used as joint use projects with other public agencies.

TAX RATE STATEMENT FOR MEASURE G

GALT JOINT UNION HIGH SCHOOL DISTRICT
GENERAL OBLIGATION BONDS

An election will be held in the Galt Joint Union High School District (the "District") on November 3, 2026, for the purpose of submitting to the electors of the District the question of incurring bonded indebtedness of the District in the maximum principal amount of $43,000,000. If such bonds are authorized and sold, the principal thereof and interest thereon will be payable from the proceeds of taxes levied on taxable property in the District. The following information regarding tax rates is given in compliance with Section 9401 of the California Elections Code. This information is based upon the best estimates and projections presently available from official sources, upon experience within the District and other demonstrable factors.

Based upon the foregoing and projections of the assessed valuations of taxable property in the District, and assuming the entire debt service on the bonds will be paid through property taxation:

1. The best estimate of the average annual tax rate that would be required to be levied to fund the bond issue over the entire duration of the bond debt service, based on assessed valuations available at the time of the filing of this statement, or a projection based on experience within the same jurisdiction or other demonstrable factors is $29.62 per $100,000 of assessed valuation (2.962 cents per $100 of assessed valuation) of all property to be taxed. It is estimated that the final fiscal year in which the tax is anticipated to be collected is 2055-56.

2. The best estimate of the highest tax rate that would be required to be levied to fund the bond issue, based on estimated assessed valuations available at the time of the filing of this statement, or a projection based on experience within the same jurisdiction or other demonstrable factors, is $30 per $100,000 of assessed valuation (3.000 cents per $100 of assessed valuation) of all property to be taxed. The estimated year in which such estimated highest tax rate will first apply is fiscal year 2029-30.

3. The best estimate of the total debt service, including the principal and interest, that would be required to be repaid if all the bonds are issued and sold is $93,507,933.

Attention of voters is directed to the fact that the foregoing information is based upon projections and estimates only. The actual timing of sales of the bonds and the amount to be sold at any time will be governed by the needs of the District and other factors. The actual interest rates at which the bonds will be sold, which will not exceed the maximum permitted by law, will depend upon the bond market at the time of sale. The actual assessed valuations in future years will depend upon the value of property within the District as determined in the assessment and the equalization process. Therefore, the actual tax rates and the years in which those tax rates will be applicable may vary from those presently estimated and stated above.

Voters should note that estimated tax rates are based on the *ASSESSED VALUE* of taxable property on the County's official tax rolls, ***not*** on the property's market value. Property owners should consult their own property tax bills to determine their property's assessed value and any applicable tax exemptions.

Dated: June 22, 2026
/s/ Anna Trunnell, Galt Joint Union High School Superintendent

IMPARTIAL ANALYSIS OF MEASURE G

PREPARED BY THE SAN JOAQUIN COUNTY COUNSEL

The California Constitution and Education Code authorize school districts to issue bonds for specified purposes if approved by the voters within district boundaries. Measure G was placed on the ballot by the governing board of the Galt Joint Union High School District ("District"). If approved, Measure G would allow the District to incur bonded indebtedness up to a maximum amount of $43 million dollars. The proceeds from the issuance and sale of such general obligation bonds could only be used for the acquisition, construction, improvement, upgrading and/or equipping of high school facilities in the District. Measure G lists the specific school facilities projects that the District intends to finance by the proposed bond sales.

No funds derived from bond sales may be used for general school operating expenses, including administrator and teacher salaries or pensions, or for any purpose or project other than those expressly stated in the measure.

To ensure that funds are spent only as specified in the measure, Measure G requires: 1) the appointment of a citizen's oversight committee; and 2) completion of annual independent performance and financial audits.

If Measure G is passed, the actual dates of sale and the amount of bonds sold would be governed by the District based on the need for construction funds and other factors. If Measure G is approved, the tax rates necessary for payment of principal and interest on any bonds sold will largely be dictated by the timing of the bond sales, the amount sold at a given sale, market interest rates at the time of each sale (although in no event greater than the maximum bond interest rate allowed by law), as well as actual assessed valuation of taxable property in the District over the term of repayment. The District's Tax Rate Statement contains the best estimates of tax rates required to service the bond debt. The District estimates the average annual tax rate levy to fund this bond is $29.62 per $100,000 of assessed valuation. The final fiscal year in which the tax is anticipated to be collected will be 2055-56. The District estimates that the total amount repayable during the life of the bond, including principal and interest, is approximately $94 million dollars.

Passage of Measure G requires approval by 55% of the voters voting thereon.

A "YES" vote on Measure G means you wish to allow the District to issue bonds in an amount not to exceed $43 million dollars.

A "NO" vote on Measure G means you do not wish to allow the District to issue the proposed bonds.

ARGUMENT IN FAVOR OF MEASURE G

Vote YES on G to Keep Galt's High Schools Safe, Modern, and Clean.

Every day, our Galt high schools prepare students for future success. Our students graduate with the necessary skills to be hired by local businesses, pursue skilled careers, or succeed in college.

While some of our schools have been updated over the years, many of the classrooms and labs that our students rely on are aging and were built for a different era of education. Leaky roofs, asbestos and mold damage, aging bathrooms and plumbing, outdated electrical wiring and old heating and ventilation systems must be addressed.

Our students deserve the same opportunities as others in the region, so they are ready to compete in college or be able to enter the local job force when they graduate.

Measure G will upgrade and expand career vocational education programs with the equipment and classrooms needed to offer job training in good-paying fields including agriculture, engineering, and skilled trades including welding.

Strict Fiscal Accountability Keeps Measure G Local:

- All funds under local control and cannot be taken by the State
- No funds can be used for administrators' salaries or pensions
- Independent Citizens' Oversight Committee and annual audits required
- Public disclosure of all spending so funds are used as promised

Measure G: Vote Yes for Galt High Schools

- Upgrade classrooms and labs to prepare students for college and careers
- Repair leaky roofs and remove asbestos and mold
- Keep high schools safe and clean
- Upgrade school safety and security systems

We can't rely on the state to fix our schools. Measure G provides dedicated local funding. Supporting quality education is a wise investment that strengthens our local economy and supports home values.

Join trusted community leaders in voting YES on Measure G for safe schools, skilled graduates, and a strong Galt community.
