upon projections and estimates only, which amounts are not maximum amounts and durations and are not binding upon the District. The actual debt service, tax rates, and the years in which they will apply may vary depending on the timing of bond sales, the par amount of bonds sold at each sale, and actual increases in assessed valuations. The timing of the bond sales and the amount of bonds sold at any given time will be determined by the District based on the need for project funds and other considerations. Actual assessed valuations will depend upon the amount and value of taxable property within the District as determined by the County Assessor in the annual assessment and the equalization process.

Summerville Elementary School District

Impartial Analysis

Walter W. Wall, County Counsel

The California Constitution and Education Code provide that school districts may issue general obligation bonds with the approval of 55 percent of voters of the district. The California Constitution further provides that the bond measure must include a requirement that the bond proceeds will be used only for the permitted purposes and other requirements designed to ensure accountability.

The Summerville Elementary School District ("District") has placed this measure on the ballot proposing to the voters in the district that general obligation bonds of the school district be issued in the maximum principal amount of $3,400,000 and that ad valorem taxes be levied upon taxable property in the school district to repay the bond indebtedness. According to the Tax Rate Statement submitted by the District, the best estimate of the highest ad valorem tax which would be levied on taxable property to repay the bonds over their term is $30.00 per year per $100,000 of assessed value. The best estimate of total debt service, including principal and interest, that would be required to be repaid if all the bonds are issued and sold will be approximately $6,900,000. The final year in which the tax is anticipated to be collected is fiscal year 2053-54.

Local Ballot Measures: School Bond Measure C

The measure provides that bond proceeds will be expended on the modernization, renovation, expansion, acquisition, construction, reconstruction, rehabilitation, or replacement of school facilities of the District, including the furnishing and equipping of school facilities. The District submitted a list of specific examples of projects authorized by this measure, including:

- Repair aging and deteriorating classrooms, restrooms, and school facilities at Buildings A and B, including HVAC, aging plumbing, sewer and electrical lines, interior renovations and finishes, ceiling and lighting upgrades, and improving walkways and student accessibility related to projects at Buildings A and B;
- Repair or replace leaky roofs at Buildings A and B;
- Upgrade campus-wide fire, safety, and security systems, including fire alarms, communication and surveillance systems, and exterior lighting; and,
- Upgrade school grounds to prevent flooding, including storm drain and asphalt repair and replacement related to these repairs and updates.

The law does not allow these bond funds to be used for teacher and administrator salaries or operational expenses. As required by law, the District must follow certain accountability provisions to oversee the funds collected and expended. This includes the establishment of an independent citizens' oversight committee and the annual completion of independent performance and financial audits.

A "yes" vote on Measure C is a vote to authorize the issuance of bonds in the amount of $3,400,000 to be financed by an annual property tax.

A "no" vote on Measure C is a vote against the issuance of the proposed bonds.

Local Ballot Measures: School Bond Measure C

Arguments in support of, or in opposition to, the proposed laws are the opinions of the authors.

Argument for Measure C

Vote Yes on C to support quality education at Summerville Elementary School.

Our beloved school is over 60 years old, and though it may look good on the outside, the infrastructure is rapidly deteriorating on the inside. Measure C will fix aging classrooms, bathrooms, plumbing, and leaky roofs, and replace outdated HVAC systems so our children can learn in a safe and healthy environment.

For the first time in its history, Summerville Elementary is asking voters to support a bond measure to repair and update our neighborhood school. After years of responsible financial stewardship and stretching every dollar, the school can no longer delay critical facility improvements.

Vote Yes on C to provide clean and safe classrooms.

Vote Yes on C to repair leaky roofs and deteriorating HVAC systems.

Vote Yes on C to improve fi re safety systems and alarms.

Vote Yes on C to repair and update aging plumbing, sewer, and electric lines.

Measure C has strict accountability requirements and will create a dedicated source of local funding that can only be used to repair and upgrade our neighborhood school.

Independent citizens' oversight and annual financial and performance audits are required, and no funds from Measure C will go towards administrators' salaries or pensions.

All Measure C funds must be spent on fixing our school.
