Local Ballot Measures: School Bond Measure C

Tax Rate Statement

Ben Howell, Superintendent of Summerville Elementary School District

An election will be held in the Summerville Elementary School District (the "District") on November 3, 2026, to authorize the sale of up to $3,400,000 in general obligation bonds. The following information is submitted in compliance with Sections 9400-9404 of the Elections Code of the State of California. Such information is based upon the best estimates and projections presently available from official sources, upon experience within the District, and other demonstrable factors.

Based upon the foregoing and projections of the District's assessed valuation, the following information is provided:

1. The best estimate of the average annual tax rate that would be required to fund this bond issue over the entire duration of the bond debt service, based on estimated assessed valuations available at the time of filing of this statement, is $30 per $100,000 of assessed valuation. It is currently expected that the tax will be collected until fiscal year 2053-54.

2. The best estimate of the highest tax rate that would be required to fund this bond issue, based on estimated assessed valuations available at the time of filing this statement, is $30 per $100,000 of assessed valuation. This rate is projected to apply in each fiscal year that bonds are outstanding.

3. The best estimate of total debt service, including principal and interest, that would be required to be repaid if all the bonds are issued and sold will be approximately $6,900,000.

These estimates are based on projections derived from information obtained from official sources, and are based on the assessed value (not market value) of taxable property on the County's official tax rolls. In addition, taxpayers eligible for a property tax exemption, such as the homeowner's exemption, will be taxed at a lower effective tax rate than described above. Property owners should consult their own property tax bills and tax advisors to determine their property's assessed value and any applicable tax exemptions. The attention of all voters is directed to the fact that the foregoing information is based

upon projections and estimates only, which amounts are not maximum amounts and durations and are not binding upon the District. The actual debt service, tax rates, and the years in which they will apply may vary depending on the timing of bond sales, the par amount of bonds sold at each sale, and actual increases in assessed valuations. The timing of the bond sales and the amount of bonds sold at any given time will be determined by the District based on the need for project funds and other considerations. Actual assessed valuations will depend upon the amount and value of taxable property within the District as determined by the County Assessor in the annual assessment and the equalization process.

Superintendent
Summerville Elementary School District

Impartial Analysis

Walter W. Wall, County Counsel

The California Constitution and Education Code provide that school districts may issue general obligation bonds with the approval of 55 percent of voters of the district. The California Constitution further provides that the bond measure must include a requirement that the bond proceeds will be used only for the permitted purposes and other requirements designed to ensure accountability.

The Summerville Elementary School District ("District") has placed this measure on the ballot proposing to the voters in the district that general obligation bonds of the school district be issued in the maximum principal amount of $3,400,000 and that ad valorem taxes be levied upon taxable property in the school district to repay the bond indebtedness. According to the Tax Rate Statement submitted by the District, the best estimate of the highest ad valorem tax which would be levied on taxable property to repay the bonds over their term is $30.00 per year per $100,000 of assessed value. The best estimate of total debt service, including principal and interest, that would be required to be repaid if all the bonds are issued and sold will be approximately $6,900,000. The final year in which the tax is anticipated to be collected is fiscal year 2053-54.
