Measure G contains none.

An open-ended general tax is different from protected services. It is a blank check that you don't get to fill in.

Demand spending protections on your money.

Vote No on Measure G.

ARGUMENT AGAINST MEASURE G

Here we go again.

For the third time, elected officials are asking for a permanent 1% sales tax on almost everything you buy in Sutter County.

Voters already said NO—twice. Apparently "no" just means try again.

This is a general tax. The money goes straight into the general fund. The nice-sounding list on the ballot (drinking water, fire stations, roads, sheriff/police patrols, fire/medical response) is not a binding promise. Future Boards can spend it on anything they choose. The "citizens' oversight committee" is appointed by the same Board and can only make recommendations. Audits show where money already went—not where it cannot go.

Most of us live paycheck to paycheck. Seniors on fixed incomes—Social Security or pensions that barely keep up—and low-income families feel a sales tax the hardest. It hits clothes, car repairs, appliances, restaurant meals, shoes, books, toys, dog food—nearly everything except groceries and prescriptions.

Visitors will pay a little. Local families will still pay most of it: probably $160 to $220 or more per person each year. That's a lot of money when every dollar counts for rent, medicine, heating, or putting food on the table.

$22.5 million a year is a big number when it comes out of our pockets every single time we shop. This permanent new tax shifts the bill onto us.

If the County truly needs money for public safety, roads, or water, put a special tax on the ballot with real, enforceable restrictions. This one doesn't have them.

Fool me once, shame on you.
Fool me twice, shame on me.
Fool me three times? NO.

Keep your hard-earned money. Tell the County to live within its means the same way the rest of us do.

REBUTTAL TO ARGUMENT AGAINST MEASURE G

Don't be fooled by politically motivated rhetoric! **Without Measure G — YOU pay the price.** Get the facts:

FACT: Sacramento politicians keep taking our tax dollars and sending nothing back. Fire, Sheriff, and road repair services have already been cut to the bone. **91% of all new General Fund money has gone to Safety, and it still can't backfill state cuts.** Enough!

FACT: Measure G keeps taxpayer dollars here, shared between Sutter County, Yuba City, and Live Oak for basic services — no depending on Sacramento politicians. Just local funds, locally controlled: **three municipalities for the price of one.**

FACT: Without Measure G, fire, emergency, and road services collapse. That means YOU wait longer when it matters most.

The Sutter County Grand Jury already sounded the alarm: outdated firefighting equipment, dangerous staffing shortages, no money to fix it. It called Yuba City's roads "severely deficient."

Some days only three Sheriff deputies patrol 600 square miles. Help can take up to 15 minutes — the difference between life and death. Without G, Live Oak loses ALL fire service this year!

Your Yes on G vote adds deputies and firefighters, replaces worn-out equipment, keeps stations open, speeds up 911 response, and repairs local roads.

FACT: Measure G is accountable. Citizen oversight, independent financial audits, and public reports guarantee it. **Voters can end Measure G at any time.**

Measure G is not a tax on your home or property and doesn't apply to food purchased as groceries or prescription medication.
